CONTACT

About the Trainer

Dr Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte. Ltd.

ROLE

Principal Trainer, Tertiary Infotech Academy Pte. Ltd.

CERTIFICATION

ITIL 4 certified — IT service management, service operations and continual improvement.

DELIVERS

Professional short courses on IT service management, IT infrastructure and IT operations.

FOUNDER

Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

Let's Know Each Other

- 1 Your name and organisation / role.
- 2 Your experience with IT service management or IT support (if any).
- 3 What you want to be able to improve in your service operations after this course.

Ground Rules

1

Set your mobile phone to silent mode.

2

Participate actively — no question is too small.

3

Mutual respect: agree to disagree.

4

One conversation at a time.

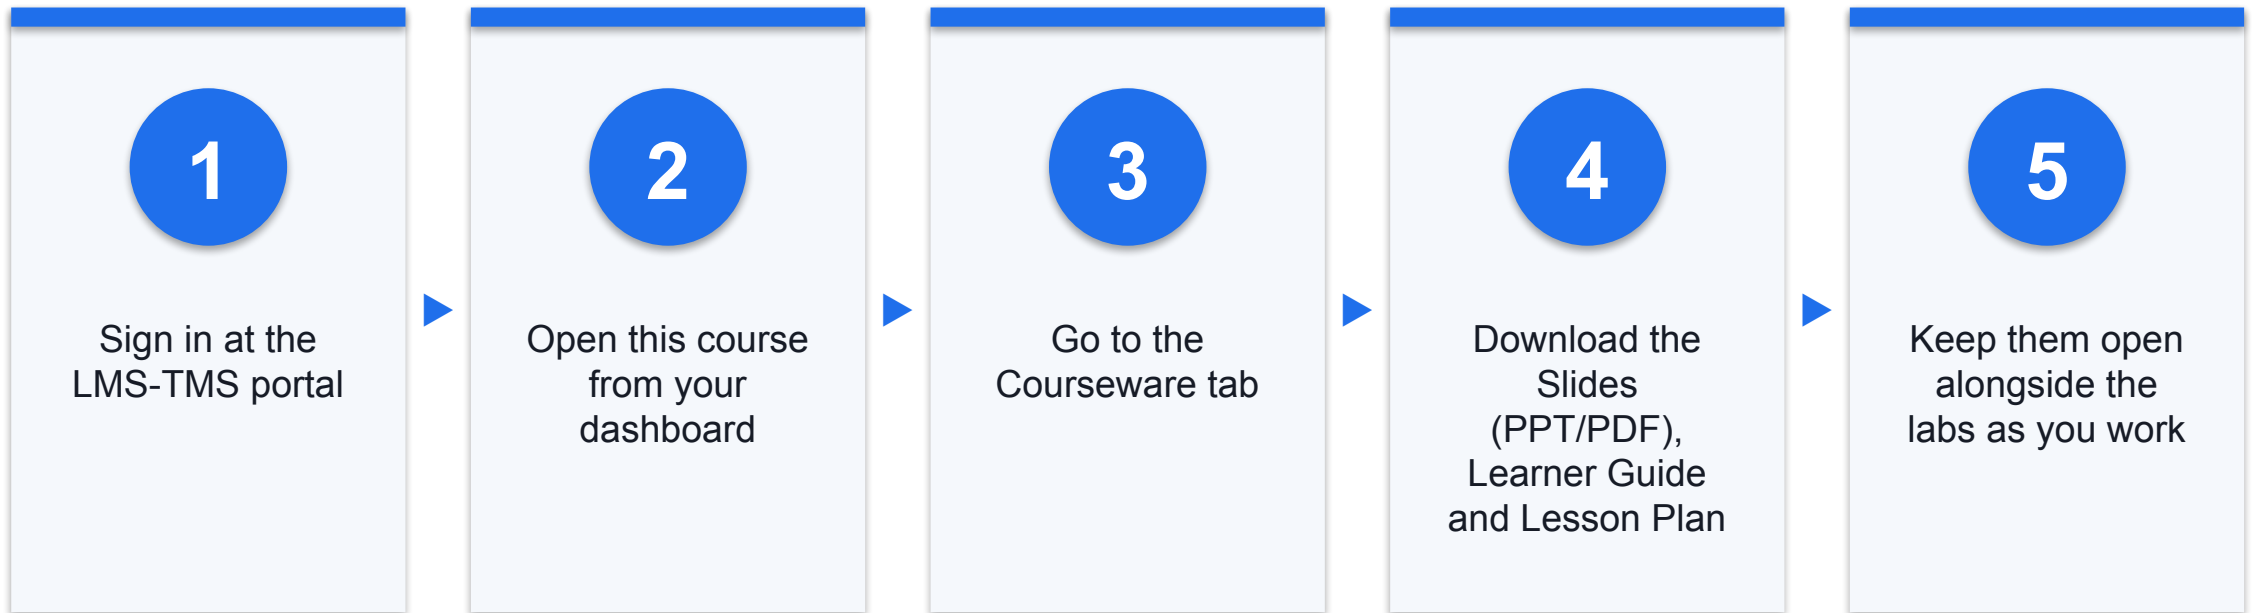

5

Be punctual; return from breaks on time.

6

Learn by doing — try every hands-on lab.

Download Course Material

Portal: <https://lms-tms.tertiaryinfotech.com>

Lesson Plan — 3 Days, 8 hours/day

Days 1–2

- Day 1 — Key Concepts of Service Management and the ITIL Guiding Principles
 - Topic 1: Understand Key Concepts of Service Management (Lab 1)
- Day 2 — The Four Dimensions of Service Management and the Service Value System
 - Topic 2: ITIL Guiding Principles (Lab 2)
 - Topic 3: The Four Dimensions of Service Management (Lab 3)
 - Topic 4: The Service Value System (Lab 4)

Day 3

- Day 3 — ITIL Practices, Capstone Labs and Exam Preparation
 - Topic 5: ITIL Practices (Labs 5–8)
- Daily timing
 - 9:30am–6:30pm · 1-hour lunch · tea breaks within training time

Learning Outcomes

1

Key Concepts of Service Management

Explain the key concepts of service management, including services, value, outcomes, costs, risks, utility and warranty, and the roles of service providers and consumers.

2

ITIL Guiding Principles

Apply the seven ITIL guiding principles to service management decisions and improvement initiatives in the workplace.

3

Four Dimensions of Service Management

Describe the four dimensions of service management and evaluate how each dimension affects the delivery of a service.

4

The Service Value System

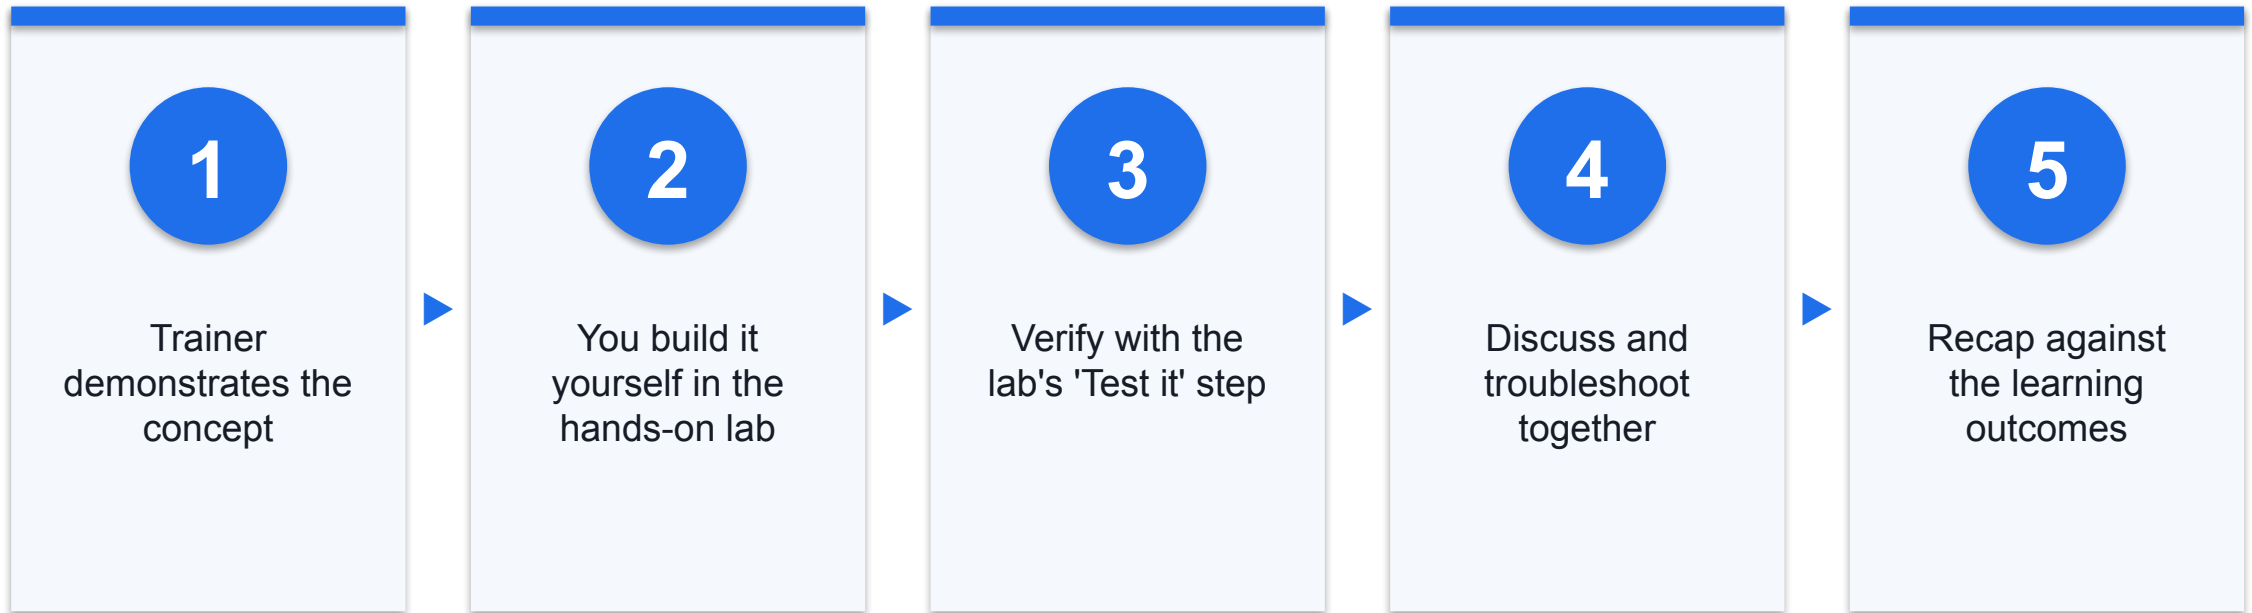

Explain the ITIL service value system and the six service value chain activities, and apply the continual improvement model.

5

ITIL Practices

Describe the purpose of the key ITIL practices and apply them to incident, problem, change and service request scenarios.

How You'll Learn

CORE CONCEPTS

IT Service Management Fundamentals

What is IT Service Management?

1

A service

A means of enabling value co-creation by facilitating outcomes customers want, without the customer managing specific costs and risks.

2

Service management

A set of specialised organisational capabilities for enabling value to customers in the form of services.

3

ITIL

A source of good practice in IT service management — validated across diverse environments and situations.

4

Value co-creation

Value is not delivered TO the consumer; it is co-created WITH them through an active service relationship.

How the ITIL Service Value System Fits Together

1

Inputs

Opportunity (options to add value) and demand (the need for services) trigger the SVS activities.

2

The system

Guiding principles and governance steer the service value chain, supported by the practices and continual improvement.

3

Output

Value co-created with stakeholders — outcomes enabled, costs and risks removed, continually improved.

WHY IT MATTERS

Value is co-created, not delivered.

The ITIL SVS describes how every component and activity works together as a system to enable value creation.

Core Distinctions You Must Master

Utility vs Warranty

- Utility — what the service DOES; functionality offered to meet a need. Fit for purpose.
- Warranty — how the service PERFORMS; availability, capacity, reliability, security, continuity. Fit for use.
- A service needs BOTH to deliver value.

Output vs Outcome

- Output — a tangible or intangible deliverable of an activity.
- Outcome — a result for a stakeholder, enabled by one or more outputs.
- Outputs are what you produce; outcomes are why the consumer cared.

Costs and Risks

- A service should REMOVE costs and risks from the consumer.
- Consuming a service also IMPOSES costs and risks of its own.
- Value is judged on the net effect of both.

How Every Lab Progresses

1 Read the BrightDesk Services scenario for the lab.

2 Work the tables and classifications in your small group.

3 Justify every classification and mapping you record.

4 Present your group's findings and defend your conclusions.

5 Cross-check against the ITIL definitions in the Learner Guide.

TOPIC 01

Understand Key Concepts of Service Management

Services · Value · Outcomes, Costs and Risks · Providers and Consumers · Utility and Warranty

Key Concepts — Understand Key Concepts of Service Management

1

A service is a means of enabling value co-creation by facilitating outcomes customers want to achieve, without the customer having to manage specific costs and risks.

2

Service management is a set of specialised organisational capabilities for enabling value to customers in the form of services.

3

Value is co-created through an active relationship between the service provider and the service consumer.

4

Service consumers take on the roles of customer, user and sponsor; providers deliver service offerings made up of goods, access to resources and service actions.

5

Outputs are deliverables of an activity; outcomes are the results a stakeholder actually achieves, enabled by those outputs.

6

Utility is what the service does (fit for purpose); warranty is how the service performs (fit for use).

Hands-On Labs — Understand Key Concepts of Service Management

Lab 1

- Service Management, Value Co-Creation, Utility and Warranty

Service Management, Value Co-Creation, Utility and Warranty

LAB 1

Work the BrightDesk Employee Digital Workplace scenario: identify the service, provider, consumer and users; separate outputs from outcomes; define utility and warranty; and map the costs and risks the service imposes on and removes from the consumer.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

LAB 1

Service Management, Value Co-Creation, Utility and Warranty

STEP 1 OF 1

1

Work through labs/lab-01 in your group, completing every step and table.

Service Management, Value Co-Creation, Utility and Warranty

Test it

Your group can state the service, its provider, consumer roles and users; separates every output from its outcome; and defends its utility, warranty, cost and risk mappings.

Recap — Understand Key Concepts of Service Management

1

You can now: Explain services, value co-creation, outputs vs outcomes, costs, risks, utility and warranty (LO1)

TOPIC 02

ITIL Guiding Principles

Focus on Value · Start Where You Are · Progress Iteratively · Collaborate · Think Holistically · Keep It Simple · Optimize and Automate

Key Concepts — ITIL Guiding Principles

1

A guiding principle is a recommendation that guides an organisation in all circumstances, regardless of changes in goals, strategies or type of work.

2

Focus on value: everything the organisation does should link back, directly or indirectly, to value for itself, its customers and its stakeholders.

3

Start where you are: assess and reuse what already exists rather than discarding it and rebuilding from scratch.

4

Progress iteratively with feedback: organise work into smaller manageable sections, executed and completed in a timely manner, using feedback at each iteration.

5

Collaborate and promote visibility: involve the right people in the right roles to improve buy-in, relevance and the likelihood of long-term success.

6

Think and work holistically, keep it simple and practical, and optimize before you automate.

Hands-On Labs — ITIL Guiding Principles

Lab 2

- Seven Guiding Principles and Decision Scenarios

Seven Guiding Principles and Decision Scenarios

LAB 2

Apply each of the seven guiding principles to a set of BrightDesk decision scenarios, stating what the principle would have you do — and stop doing — in each case.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

Seven Guiding Principles and Decision Scenarios

STEP 1 OF 1

1

Work through labs/lab-02 in your group, completing every step and table.

Seven Guiding Principles and Decision Scenarios

Test it

Your group can name all seven guiding principles and, for each decision scenario, justify which principle applies and what it changes in practice.

Recap — ITIL Guiding Principles

1

You can now: Apply the seven ITIL guiding principles to service management decisions (LO2)

TOPIC 03

The Four Dimensions of Service Management

Organizations and People · Information and Technology · Partners and Suppliers · Value Streams and Processes

Key Concepts — The Four Dimensions of Service Management

1

The four dimensions ensure a holistic approach to service management; every component of the SVS must be considered from all four.

2

Organizations and people covers roles, responsibilities, structures, culture and the competencies needed to deliver the service.

3

Information and technology covers the information and knowledge required, plus the technologies that support and enable the service.

4

Partners and suppliers covers relationships with other organisations involved in the design, deployment, delivery and support of services.

5

Value streams and processes covers how the parts of the organisation work together, in an integrated and coordinated way, to enable value creation.

6

External factors — political, economic, social, technological, legal and environmental (PESTLE) — constrain and shape all four dimensions.

Hands-On Labs — The Four Dimensions of Service Management

Lab 3

- Four Dimensions of Service Management

Four Dimensions of Service Management

LAB 3

Analyse the BrightDesk service across organizations and people, information and technology, partners and suppliers, and value streams and processes; apply PESTLE to the external factors; and identify the weakest dimension.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

Four Dimensions of Service Management

STEP 1 OF 1

1

Work through labs/lab-03 in your group, completing every step and table.

Four Dimensions of Service Management

Test it

Your group has findings under all four dimensions, has applied PESTLE to the external factors, and can defend which dimension is the weakest and why.

Recap — The Four Dimensions of Service Management

1

You can now: Evaluate a service across the four dimensions of service management and PESTLE factors (LO3)

TOPIC 04

The Service Value System

ITIL SVS · Plan · Improve · Engage · Design and Transition · Obtain/Build · Deliver and Support

Key Concepts — The Service Value System

1

The ITIL service value system describes how all components and activities of the organisation work together as a system to enable value creation.

2

The SVS comprises guiding principles, governance, the service value chain, practices and continual improvement; its inputs are opportunity and demand.

3

The service value chain is a set of six interconnected activities an organisation performs to deliver a valuable product or service to its consumers.

4

Plan ensures a shared understanding of vision, status and improvement direction; improve ensures continual improvement of products, services and practices.

5

Engage provides understanding of stakeholder needs and transparency; design and transition ensures products and services continually meet expectations.

6

The continual improvement model runs from 'What is the vision?' through to 'How do we keep the momentum going?' in seven steps.

Hands-On Labs — The Service Value System

Lab 4

- Service Value System and Service Value Chain

Service Value System and Service Value Chain

LAB 4

Map the BrightDesk SVS: identify opportunity and demand as inputs, then trace a request through the six value chain activities, listing the inputs and outputs of each.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

Service Value System and Service Value Chain

STEP 1 OF 1

Work through labs/lab-04 in your group, completing every step and table.

Service Value System and Service Value Chain

Test it

Your group has traced a request end-to-end through all six value chain activities, with a named input and output for each activity.

Recap — The Service Value System

1

You can now: Explain the ITIL service value system and the six service value chain activities (LO4)

TOPIC 05

ITIL Practices

Continual Improvement · Change Enablement · Incident · Problem · Service Request · Service Desk · Service Level Management

Key Concepts — ITIL Practices

1

A practice is a set of organisational resources designed for performing work or accomplishing an objective; ITIL 4 defines 34 practices in three groups.

2

Incident management minimises the negative impact of incidents by restoring normal service operation as quickly as possible.

3

Problem management reduces the likelihood and impact of incidents by identifying actual and potential causes; a known error is an analysed problem not yet resolved.

4

Change enablement maximises the number of successful IT changes by ensuring risks are properly assessed and changes authorised by a change authority.

5

The service desk captures demand for incident resolution and service requests, and is the entry point and single point of contact for users.

6

Service level management sets clear business-based targets for service performance, documented in service level agreements (SLAs).

Hands-On Labs — ITIL Practices

Labs 5–6

- Incident, Problem, Service Request, Service Desk
- Change Enablement, Release and Deployment

Labs 7–8

- Service Level Management, Continual Improvement and Metrics
- ITIL Capstone and Exam Readiness

Incident, Problem, Service Request, Service Desk

LAB 5

Triage a morning's BrightDesk contacts: classify each as an incident, problem, known error or service request, justify the classification, and design the handling path.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

Incident, Problem, Service Request, Service Desk

STEP 1 OF 1

Work through labs/lab-05 in your group, completing every step and table.

Incident, Problem, Service Request, Service Desk

Test it

Your group has classified every contact in the morning's queue as incident, problem, known error or service request, and can justify each handling path.

Change Enablement, Release and Deployment

LAB 6

Classify BrightDesk changes as standard, normal or emergency; assign the right change authority; and distinguish deployment from release.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

Change Enablement, Release and Deployment

STEP 1 OF 1

1

Work through labs/lab-06 in your group, completing every step and table.

Change Enablement, Release and Deployment

Test it

Your group has classified every change as standard, normal or emergency with the right change authority, and can state the difference between release and deployment.

Service Level Management, Continual Improvement and Metrics

LAB 7

Write business-based SLA targets for the BrightDesk service, avoid the watermelon SLA, and run the seven-step continual improvement model against a real shortfall.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

LAB 7

Service Level Management, Continual Improvement and Metrics

STEP 1 OF 1

Work through labs/lab-07 in your group, completing every step and table.

Service Level Management, Continual Improvement and Metrics

Test it

Your group has business-based SLA targets (not just technical metrics) and a completed seven-step continual improvement plan for the shortfall.

ITIL Capstone and Exam Readiness

LAB 8

Bring the whole course together on the BrightDesk improvement case, then work exam-style questions across all five topics.

You'll build

The completed lab worksheet for this activity.

Tools: Lab worksheet, ITIL 4 Foundation slides, Learner Guide

ITIL Capstone and Exam Readiness

STEP 1 OF 1

1

Work through labs/lab-08 in your group, completing every step and table.

ITIL Capstone and Exam Readiness

Test it

Your group has completed the BrightDesk improvement case and reviewed its answers to the exam-style questions across all five topics.

Recap — ITIL Practices

1

You can now: Apply incident, problem, service request and service desk practices to real contacts (LO5)

2

You can now: Apply change enablement and distinguish change types, change authorities, release and deployment (LO5)

3

You can now: Apply service level management and the continual improvement model to service performance (LO5, LO4)

4

You can now: Consolidate all five topics and rehearse ITIL 4 Foundation exam-style questions (LO1–LO5)

WRAP-UP

Course Summary & Next Steps

What You Achieved

1

Key Concepts of Service Management

Explain the key concepts of service management, including services, value, outcomes, costs, risks, utility and warranty, and the roles of service providers and consumers.

2

ITIL Guiding Principles

Apply the seven ITIL guiding principles to service management decisions and improvement initiatives in the workplace.

3

Four Dimensions of Service Management

Describe the four dimensions of service management and evaluate how each dimension affects the delivery of a service.

4

The Service Value System

Explain the ITIL service value system and the six service value chain activities, and apply the continual improvement model.

5

ITIL Practices

Describe the purpose of the key ITIL practices and apply them to incident, problem, change and service request scenarios.

Preparing for the ITIL 4 Foundation Exam

1

An official ITIL 4 Foundation exam voucher is included with this course — book your exam while the material is fresh.

2

Review the key concepts and definitions in each topic of the Learner Guide.

3

Re-read the seven guiding principles and be able to apply each to a scenario.

4

Memorise the purpose statements of the ITIL practices covered in Topic 5.

5

Be able to distinguish incident, problem, known error, workaround, service request and change.

6

Attempt the practice exam and review every explanation:
<https://exams.tertiaryinfotech.com/practice-exams/axelos/axelos-til4-foundation>

Keep Practising After the Course

1

Re-run the labs on your own machine — repetition is what makes the skills stick.

2

Apply the techniques to a real process or project in your own organisation.

3

Your course material stays available at <https://lms-tms.tertiaryinfotech.com/>.

4

Explore the follow-on courses at www.tertiarycourses.com.sg.

SERVICE MANAGEMENT EXCELLENCE

Thank You!

You are now ready to apply ITIL 4 service management practices in your organisation — and to sit the ITIL 4 Foundation exam with your included voucher.
